

# Bed Rack Tonneau Adapter Installation

## Included Hardware Kit

A.	5/16" x 3/4" Carriage Bolt	18 ea.
B.	5/16" Washer	18 ea.
C.	5/16" Lock-nut	18 ea.
D.	3/8" x 1" Carriage Bolt	6 ea.
F.	3/8" Washer	6 ea.
G.	3/8" Lock-washer	6 ea.
H.	3/8" Hex Nut	6 ea.

1. This kit allows the mounting of RCI Bed Rack with many brands and variations of tonneau covers. Please note that not all covers are compatible, and SOME covers are compatible but will not be able to open such as hard folding tonneau covers. This kit is designed to work only with the RCI adjustable bed racks. Note that this kit will increase the mounting height of your bed rack by 3".
2. Install Z-brackets along the bed rail as shown in the picture. Note that these must be measured precisely to match the spacing of the bed rack since they can be extremely difficult to move once the tonneau rails are in place. There is mounting holes on the top and inside of the Z-brackets. Most tonneau covers will not allow you to use the inside mounting holes but some will. Most truck models WILL allow you to drill through the top of the rail and install a bolt and nut and there are extra 5/16" carriage bolts supplied for this purpose.

**\*Most tonneau rails will securely clamp the Z-brackets in place without any drilling but we recommend doing so as an added safety measure (at least on 2 or more of the brackets).**

3. Install tonneau cover per manufacturer instructions. Make sure that the tonneau cover brackets did not move if you did not through-bolt them to the bed caps.
4. Install the Bed Rack mounting brackets to the Z-brackets using the supplied 5/16" carriage bolts, washers, and lock-nuts.
5. You can now install your bed rack. Use the 3/8" carriage bolts in install them from the inside of the brackets, through the mounting feet of the bed rack, then secure with washers, lock-washers, and nuts.
